

Josué Daniel Merino Pineda

Santander, España · josuemerino.dev · +34 603 52 86 95 · josue091201@gmail.com

Senior Full-Stack Software Engineer with 5+ years of experience architecting scalable backend systems and integrating advanced Artificial Intelligence solutions (LLMs/RAG). Proven expertise translating complex business logic into robust architectures using the **modern PHP ecosystem (Laravel/Symfony)** and Python (FastAPI). Strong focus on containerization (Docker), database design (MySQL/PostgreSQL), and delivering high-performance APIs for enterprise clients.

PROFESSIONAL EXPERIENCE

ICloudCompliance

Programmer

Valencia, Spain

July 2025 – December 2025

- Architected and deployed an AI Chatbot (LLM) specialized in compliance standard consultation.
- Engineered a secure Document Manager system with granular role-based access control (RBAC).

SIALI IT

Analyst Software

Guarnizo, Spain

December 2024 – July 2025

- Developed and deployed real-time Computer Vision pipelines and AI models for object detection and segmentation.
- Creative design of intuitive web pages, implementing animations and highlighting relevant information for the client
- Designed intuitive, data-driven web interfaces focusing on client-facing analytics and seamless animations.
- Implemented high-speed microservices and rapid API endpoints utilizing Python (FastAPI).

VIACORE IT

Fullstack Developer

Santander, Spain

November 2023–May 2024

- Developed a secure patient monitoring system with Node.js/Express.js for effective communication between hospital staff and relatives.
- Integrated ReactJS with TypeScript and Material UI to build interactive healthcare dashboards, processing and visualizing complex medical data.

FUNIBER

Backend Developer

Santander, Spain

January 2020–July 2023

- Designed end-to-end backend architectures, including complex business logic encapsulation, API design, and multi-database management (MySQL).
- Led the execution of complex mathematical operations on the backend while successfully bridging the gap with frontend layers (React/Vue) to modernize legacy systems.

EDUCATION

EUROPEAN UNIVERSITY OF THE ATLANTIC

Computer Engineering

Santander, Spain

ADDITIONAL SKILLS

- Native in Spanish and fluent in English.
- Hungry for knowledge and never stop learning
